PEGBOARD CHECKS

Manual “One-Write” Accounting Systems

Pegboard Systems – More useful than ever!

The small business boom created a resurgence of a need for a superior, yet simple bookkeeping system for new startup organizations.

Demands on the time of a small business owner starting his or her company don't permit spending hours learning some confusing accounting software. However, maintaining accurate records is critical to the survival of the business. And frankly, most small businesses don't need all the complicated bells and whistles that come with those programs.

Pegboard accounting systems are the perfect solution for saving time and money while still keeping accurate records for the small business entrepreneur. There's no need to learn costly software and you eliminate multiple entries required for other manual accounting methods, minimizing errors.

One-Write Pegboard products include:

- Complete “Starta-Systems”
- Binders & Posting Trays
- A wide variety of checks
- Journals
- Ledgers
- Matching Envelopes
- Statements
- Receipts
- Compensation Records
- **AND MUCH MORE!**

Complete “Starta-Systems” are available.

Every “Starta-System” includes: All you need to get your business rolling including business checks for either disbursement and/or payroll, a folding pegboard binder, journals, matching envelopes for your checks, and easy to understand instructions on how to use the system.

The One Write Advantage: Write once and all the duplicate entries and transposition errors are eliminated. No entries in check stubs or registers, and no envelopes to address.

Manual “One-Write” Accounting Systems

Additional accessories and replacement items also available.

To make your Starta-System more useful, add ledgers or compensation records. The system can be used for statements and receipts as well. And, finding what you need fast is easy with trays, post binders, indexes and other One-Write pegboard accessories.

A wide range of compatible systems available.

If you are already using pegboard, we offer the most extensive line of pegboard products around. This selection includes a variety of compatible pegboard punch styles including many hard to find forms.
