

LOCKING IN great value with Healthcare Products!

Save Time With Color-coded Filing

It's based on the principle that the human eye sees and recognizes colors and patterns of colors faster and at a greater distance than it does letter or numbers. Color coding also aids in more rapid file searches, the system can be a significant asset for purging and storage of old files.

Long-lasting Compatible Labels and Folders

Compatible labels are available for all the most popular systems, available in rolls, file boxes, and ring book binders. Our adhesive labels hold longer, colors remain bright and are fade resistant. Our File quality translates into long lasting durability.

Custom Applications

Custom labeling, custom filebacks and indexes, and will custom print file folders to meet all special requirements.
